

Our vision is to provide clean energy – anytime, anywhere, to anyone. We at LichtBlick have been reinventing energy ever since we founded our company in 1998. Today we are Germany’s largest independent provider of green energy and green gas. As an energy and IT company, we are playing an important role in the ‘Energiewende’ energy transition: With our innovation called ‘SchwarmEnergie’ we are developing smart solutions that guarantee a supply of distributed and renewable energy. This is how we create the heart of the energy world. We believe that the ‘Energiewende’ is the task of our generation. Generation of clean energy.

To help us further expand our international IT platform for the energy market of the future, we are looking to hire for the following position in Hamburg starting at the earliest possible date:

Software Engineer (f/m)

IT Platform for the International Energy Business

These are your tasks:

The ‘SchwarmDirigent’ is a ‘SchwarmEnergie’ IT platform that is unique in the energy market and represents years of intensive development work as well as extensive energy and IT expertise. With this tool, we can tackle the challenges of an increasingly complex energy world, one in which smart networking and optimized marketing are becoming more and more important. Learn more about ‘SchwarmEnergie’ and ‘SchwarmDirigent’ [here](#).

Over the next few years, we aim to replicate our success in Germany on the international market with the IT platform ‘SchwarmDirigent’, a high-performing and flexible platform that manages capacities in distributed energy production and storage.

In this exciting environment, you will take on the following responsibilities while working as a part of agile teams of developers:

- Carrying out intricate technical specifications for specialist requirements
- Implementing these requirements within the context of projects and/or the ongoing evolution of the system
- Overseeing quality assurance and introducing any implemented (partial) systems
- Advising and consulting with internal and external clients concerning questions, problems and new requirements

These are your qualifications:

- Extensive practical experience in and enthusiasm about software architecture, design and development using object-oriented programming in Microsoft .NET
- Experience using ASP.NET MVC 5 for client development
- Ideally, experience in test-driven development and continuous integration
- Knowledge about relational databases, preferentially Oracle
- Analytical and structured thinking and methods
- You are an excellent team player who enjoys intense collaboration and can communicate well with those giving you assignments as part of an agile, scrum-oriented development process
- Ability to deal well with change, for example, when it comes to business models or energy policies
- Proficient in written and spoken English

In addition to a varied set of tasks and the opportunity to take on responsibility in a friendly working environment, we offer a variety of other benefits such as flexible working hours, the chance to work from home, sabbaticals, sports and health offerings, free drinks and organic fruit at the office and much more.

We are looking forward to receiving your application documents in one file by email to personal@lichtblick.de
